Main features

Connectable to tension control systems or frequency modulation systems to control rotation speed and noise level

5 noise level steps

5 power levels per diameter in standard configuration

Protection class IP54, IP55 according to IEC/EN 60529/DIN 40050

Isolation class F or H

Statical and dynamical trimming according to ISO 1940/1

Service-free motors

Rotor diameters between 230 mm and 1.000 mm
